

Singapore Green Plan 2030

TRANSPORTATION

Encouraging Electric Vehicle (EV) Adoption

- 60,000 EV charging points at public carparks and private premises by 2030.
- \$30 million set aside for EV-related initiatives over the next 5 years.
- Increasing affordability of electric cars by narrowing the cost differential between electric cars and internal combustion engine (ICE) cars
 - Lower Additional Registration Fee floor from \$5,000 to \$0 for electric cars from Jan '22 to Dec '23
 - Adjust road tax for electric cars so that mass-market electric cars pay road tax comparable to ICE cars

FOOD RESILIENCE

Agri-Food Cluster Transformation Fund

- \$60 million fund to continue supporting tech adoption in the agri-food sector.

GREEN FINANCING

- Green bonds for select public infrastructure projects
- Deepen market liquidity for green bonds
- Attract green issuers, capital, and investors to our financial centre
- Up to \$19 billion of public sector green projects as a start

ACTIONS OF OUR PEOPLE

- GreenGov.SG initiative for the public sector
- Enterprise Sustainability Programme
